

Concrete Answers for Better Living®

## Leaders in Innovation for Over 40 Years

## The Mortex Difference

### Concrete Answers for Better Living®

For over 40 years, Mortex has been the contractor's choice for innovative and superior quality products. In 1962, Mortex revolutionized the swimming pool industry with the introduction of Keystone Kool Deck®, a product that literally changed the face of swimming pool decks forever. Since then, Mortex has continued to set the industry standards for product innovation, quality and customer service.

Today, Mortex is the brand to trust. When you're doing your best job, have the quality of Mortex products working for you.

### Thank You for Choosing Mortex Plastics

Mortex offers the best solutions for concrete drainage and crack control needs. Mortex was the first to perfect multicolored PVC extrusions in this field, and offers a full line of superior products. Engineered and manufactured to the highest standards, Mortex products help ensure the contractor's job is done right. Unmatched in quality, Mortex drainage and crack control products offer you:

- Patented designs that add function and beauty.
- Easy to install solutions.
- A wide variety of colors to choose from.

Choose Mortex. Choose success.

# Control Joint: Stop Cracking at its Source

## Easy to Install, Designed for Durability

Mortex Control Joint was designed for maximum efficiency, durability, and functionality. Manufactured to exact standards, Mortex's patented design offers:

- A unique "V" shaped bottom end profile that ensures a positive breaking point.
- Stabilizing fins add superior stability and keep water from freely reaching the subsoil.
- Internal bridges are shaped to accommodate for lateral flexing from shifting concrete.

Mortex Control Joint provides an attractive, maintenance-free, long-lasting solution. Available in five beautiful colors, including the only marble in the industry, Mortex Control Joint will compliment or match any pool deck and landscape.

## Expansion Base: For Full Contraction

Control joint can also be used with Mortex's patented Expansion Base for both a full expansion/contraction and for use in stopping and restarting concrete pours. Designed to work with the elements, Mortex Expansion Base is a must for your next project.

## Foam Fiber Joint: Flexibility in Crack Control

Foam Fiber Joint is an adaptable solution for crack control where control joint is impractical.

Mortex Foam Fiber Joint's flexible polyethylene cushioned joint is perfect between existing structures, like walls and foundations or a new concrete pour. Foam fiber joint key features include:

- Triple cut to allow half or full widths depending on the thickness of your pour.
- Top segment is removable, allowing space for caulking with a self-leveling sealant.
- Resilient and cost-effective.
- Environmentally friendly – manufactured without ozone damaging CFCs.

# The Rite Way to Drain

**Designed to Preserve**  
Employing a unique design of "V" angles, Mortex Drain Rite is engineered to help preserve concrete decking.

## Drain Rite Designed for Versatility

Mortex Drain Rite® is the most versatile water drainage system available for pool decks, porches, and walkways. It is multifunctional, serving as a deck drain, a full expansion/contraction joint, and a screed for the concrete finisher. Mortex Drain Rite prevents staining and accidents by keeping water off of the deck, and it also keeps water out of the subsoil to eliminate unwanted concrete shifting.

Mortex Drain Rite is uniquely designed to:

- Allow debris to be washed away to prevent clogging.
- Maintain maximum drainage and prevent puddles.
- Allow for horizontal compression.
- Flat sided for ease of installation and versatile applications.
- Provide a non-directional system requiring a minimum of fittings.
- Variety of fittings to enhance the finished quality of the job and allow for maximum efficiency.

**Accessories and Options**  
Drain Rite accessories are available in many variations of angles, spouts, caps and covers.

Made of Mortex's specially formulated, high impact PVC, Drain Rite resists weathering, acid, chlorine, etc. It is available in a variety of beautiful, landscape complementing colors.

# Replacement Tops for Drain Rite and Control Joint

## **Specially Formulated, High Impact Solution**

Drain Rite® and Control Joint Replacement Tops are an innovative and convenient way to repair existing drains and joints. Made of Mortex's specially formulated, high impact PVC, replacement tops resist weathering, acid, chlorine, etc. Designed with the same upper-end profiles as Mortex Drain Rite and Control Joint, replacement tops provide all of the same drainage and expansion/contraction benefits.

Installation of replacement tops requires a minimal amount of training and offers an economical alternative to full replacement of control joints and drains. Available in a variety of colors, replacement tops can also be used to change colors to match a change in deck color.

## The Most Complete Deck Drainage Solution

### Drain Rite Accessories Let You Direct the Flow

Drain Rite® connection accessories are made from the same lineal, heavy-wall one piece materials as Mortex Drain Rite. All connections feature obstruction-free water flow, because they use outside couplers.

Drain Rite connection accessories are available in all Mortex colors, including the only marble colored PVC drain in the industry. All fittings are non-directional, requiring less combinations to be stocked to achieve your design. All connections are locked into the concrete by inside key ways that stop the flow of water to the subsoil.

Drain Rite spouts, caps and covers are made to complete your drainage system. All spouts feature our unique obstruction-free water flow by connecting to the outside of the drain.

All spouts connect to standard 1 1/2 inch PVC pipe for carrying away water. Accessories include End Caps for closing a drain end decoratively, and Clean Out Covers to allow access for internal flushing and rinsing.
